d. Demonstration of the App (The Movie)

MOTIVATION

Every day billions of people struggle for better health-care. We are on the mission to help the mankind to live healthier and longer. This app is looking to simplify health-care access and help you to make health-care decisions. With search, we help you to find and decide on the right health-care providers across doctors, hospitals, diagnostics and other emergency contacts. You don't need to stand in a queue for an appointment! Here, the gap between you and the appointment booking is the thing we would minimize

TECHNOLOGIES USED:

- Flutter: Google's UI toolkit for building beautiful, natively compiled applications for mobile, web, and desktop from a single codebase.

- DART: It is aclient-optimized language for fast apps on any platform (iOS or Android).

- Google Firebase: Firebase gives you functionality likeanalytics, databases, messaging and crash reporting so you can move quickly and focus on your users.

- Visual Studio Code: Visual Studio Code is a source-code editor made by Microsoft for Windows, Linux and macOS.Features include support for debugging, syntax highlighting, intelligent code completion. It'sopen source.

- NGrok Software: To port the Local Host of 5000 globally so that anyone could access the Server.
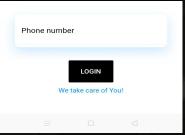

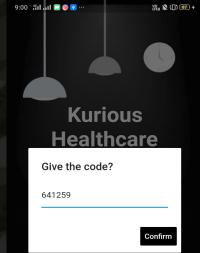

1. The Login Page

- A Login Page is displayed as soon as the User Clicks on the App Icon.

- The User has to enter The Mobile No. and click on the Login Button.

Continued....

- After entering the Phone number, a verification code will be send through sms. (Using the Google Firebase)

- User have to type the verification code in the Pop-up Window on the screen and then Click on the "Confirm".

- If the entered code is a valid verification, We Welcome you to Kurious Healthcare!

2. The Dashboard

- After successful login, a splash will be display for few seconds .

- We allow the user to Choose Doctors based on two options:

1. Hospitals
2. Specialty

And hence, we have these two varities of Dashboards.

Continued...

- Now, we present you the Doctor's List:

1. On the left-hand side, The screenshot resembles the List of Doctors of a particular Hospital chosen in the previous Stage.

2. On the right-hand side, The screenshot resembles the List of Doctors of a particular Specialty.

Fortis Hospital

Specialty | Profile | Urgent Call | Search
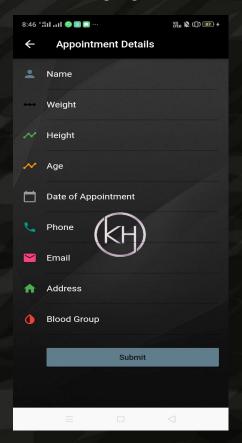

An Important piece of Info:

- We give you the option of Checking out the Details of the Hospital by clicking on the "info" icon on the Top-Corner.

- You get the Address and the Contact Info of the Hospital.

- Surprisingly, We allow you to call the Hospital instantly by clicking on the "Call" Button!!

3. Appointment

- Now, the user needs to book an Appointment and hence, needs to fill up a Form.

- After the Form has been filled up, we display the details to be Confirmed by the user!
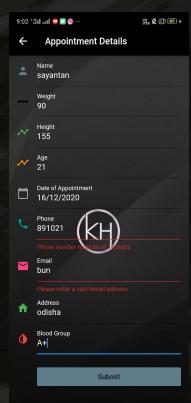

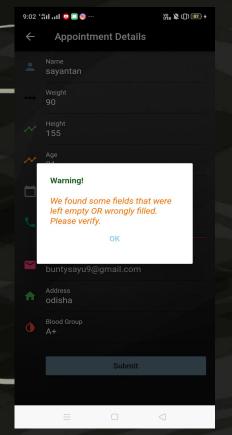

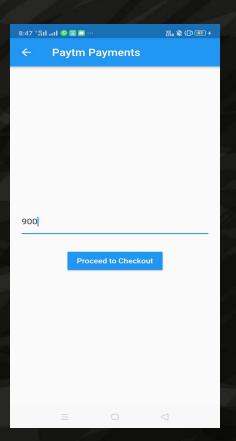

We need Valid Details please!

- We want valid details.

- Hence, we have system validation for Phone, Date, Email and Blood Group.

- If not valid, We show a Warning!
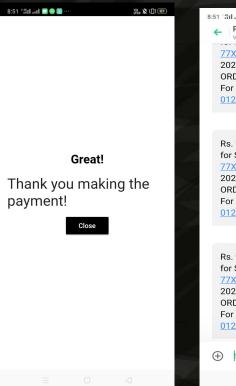

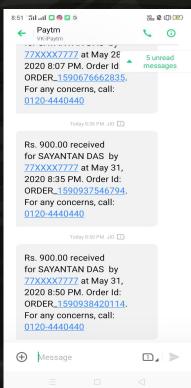

4. The Payment Dashboard

- After filling appointment details successfully, the user has to make payment for the appointment by selecting suitable means of payment mode.

- And here we use the Paytm Payment API created by the Paytm.

Continued...

Great!

Thank you making the payment!
